# VISION 01 Curtain Set

A material satin with an elegant fall is embellished with a full-bodied raised embroidery. A tone-on-tone boucle yarn of firm thickness traces an abstract geometric pattern. The material becomes a drawing, starting a research in harmony with the visual world and the artistic interests of Pre-War Europe, of which the interiors of J-M Frank suggestions emerge from an even earlier period, in which a figurative Mondrian painted his woods. Vision embroiders its version of the spirit of arts and crafts: a substantial and deliberately “grossier” reading. A deliberately raw and material effect with strong relief effects.

#### INSPIRATION

*Triangles, circles, squares, lines, rectangles and spheres are all links in a neatly-arranged chain, setting a contemporary mood and creating a dramatic visual impact. Geometrical motifs catch the light, enhancing smooth, lamé and satin-finish textures.*

*The fuss-free elegance of the Vogue 36 curtains stems from a thoughtful exploration of matter and shape. The end result is a superbly-balanced geometrical design that will help to build exclusive environments packed with personality.*

The exquisitely embroidered geometrical shapes ooze refinement and delicately catch the light with the faceted three-dimensional detailing achieved by expertly inclined needles. An elegant juxtaposition of textures and shades is enhanced by curated details and unusual decorative sensibilities.
